Professional Summary

Computer Science & Engineering graduate with strong foundations in Python, Data Structures & Algorithms, Object-Oriented Programming, SQL, DBMS, and Operating Systems. Hands-on experience with Django, REST APIs, Git, and software development, with practical exposure to debugging and problem-solving. Solved 150+ LeetCode problems covering arrays, linked lists, trees, graphs, binary search, DFS, BFS, and sliding window techniques. Seeking an entry-level Software Engineer role to contribute to building reliable and scalable software solutions.

Education

GM Institute of Technology

Bachelor of Engineering in Computer Science

Davangere, Karnataka

Graduated June 2026

Experience & Internship

Python Full Stack Development Trainee

Feb 2026 – Present

QSpiders

Bangalore, Karnataka

- Completed training in Python, Object-Oriented Programming, Oracle SQL, HTML, CSS, JavaScript, and Django fundamentals.
- Practiced REST APIs, HTTP methods, JSON, relational databases, and basic debugging techniques.
- Applied Python programming, Pandas, and NumPy through coding exercises and development practice.
- Solved 150+ LeetCode problems covering arrays, linked lists, trees, graphs, binary search, DFS, BFS, sliding window, and other algorithmic techniques.

Technical Skills

Languages: Python, JavaScript, SQL (Oracle), HTML, CSS

Backend: Django, REST APIs, HTTP Methods, JSON

Databases: Oracle SQL, Relational Database Concepts, DBMS

Data Analysis: Pandas, NumPy

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs, Binary Search, Two Pointers, Sliding Window, DFS, BFS, Topological Sort, Disjoint Set (Union-Find), Sorting Algorithms

Core Computer Science: Object-Oriented Programming (OOP), Operating Systems, Software Testing, Debugging

Tools: Git, GitHub, VS Code

Projects

Blockchain-Based Land Registration System | *Solidity*

2025

- Developed a blockchain-based land registration system for secure land ownership and transfer.
- Implemented immutable transaction records to improve transparency and data integrity.

JavaScript Mini Projects | *HTML5, CSS3, JavaScript*

2025

- Built a Weather Application using the OpenWeather API to retrieve and display real-time weather information.
- Developed an Expense Tracker, Quiz App, To-Do List, Calculator, Digital Clock, and Stopwatch using JavaScript.
- Applied JavaScript programming, DOM manipulation, event handling, and API integration across multiple applications.

Training Project

Echo Eats – Voice-Based Food Ordering System | *React, Django, MySQL*

2025

- Developed a voice-based food ordering system using React, Django, and MySQL.
- Implemented REST API communication between the frontend and backend and integrated database operations using MySQL.

Certifications

The Joy of Computing Using Python – **NPTEL**

2024

Introduction to Internet of Things – **NPTEL**

2024

The Complete Full-Stack Web Development Bootcamp – **Udemy**

2025

Additional Information

Languages Spoken: English (Professional), Kannada (Native), Hindi (Intermediate)
